

Dear Parents:

We are very excited to announce that students in the Espanola Public School district have been chosen to participate in an amazing math program called Apangea Learning. This program, if used with fidelity will improve their math scores tremendously in grades 3rd through 12th.

Apangea Learning is an online math program which teaches students how to problem solve using a simple five step process. The Apangea program will assist students with our math curriculum. Parents – you can work on this program with your children. They will have fun learning and you will too!

Your students will earn points for the questions they complete in each learning “thread” or lesson. We would like to have your students earn as many points as possible. Students will earn points redeemable for prizes, such as GameStop Gift Cards, Wal-Mart Gift Cards among others.

Apangea Learning provides live teacher support and help online – your child will have a teacher or tutor working with them until 10pm, MST.

Espanola Valley High School has a limited number of slots available, on first come first served basis. This intervention will be held on Saturdays, or can be accessed from home. This is not a credit recovery initiative. This intervention is designed to help your child achieve the scores and gain a higher knowledge of math and the skills needed to graduate.

This program will be available throughout the year. If your child is in need of this intervention at anytime please contact us. For additional information you may contact: Larry DeAguero at 367-3330 or Regina Martinez at 367-3309.

If you and your child are interested in this program, please complete this form and return it to your child's Math Teacher. You will be contact by school officials with pertinent information.

Thank you for your time and participation. We look forward to seeing how much our students learn using this amazing program!
